**Minorities, Rights and the Law in Malaysia** Mar 09 2022 This book analyses the mobilisation of race, rights and the law in Malaysia. It examines the Indian community in Malaysia, a quiet minority which consists of the former Indian Tamil plantation labour community and the urban Indian middle-class. The first part of the book explores the role played by British colonial laws and policies during the British colonial period in Malaya, from the 1890s to 1956, in the construction of an Indian "race" in Malaya, the racialization of labour laws and policies and labour-based mobilisation culminated in the 1940s. The second part investigates the mobilisation trends of the Indian community from 1957 (at the onset of Independent Malaya) to 2018. It shows a gradual shift in the Indian community from a "quiet minority" into a mass mobilising collective or social movement, known as the Hindu Rights Action Force (HINDRAF), in 2007. The author shows that activist lawyers and Indian mobilisers played a crucial part in organizing a civil disobedience strategy of framing grievances as political rights and using the law as a site of contention in order to claim legal rights through strategic litigation. Highly interdisciplinary in nature, this book will be of interest to scholars and researchers examining the role of the law and rights in areas such as sociolegal studies, law and society scholarship, law and the postcolonial, social movement studies, migration and labour studies, Asian law and Southeast Asian Studies.

**David Vizard's How to Port and Flow Test Cylinder Heads** Aug 22 2020 Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

**The Spiritual Life** Jun 19 2020 We found this lost classic among the cherished works that French Catholics risked everything to save when the Church was under attack -- in the frenzied days of the French Revolution and its aftermath. French Catholics valued this book as a tough, uncompromising handbook on how to deal with the obligations and problems of the spiritual life. It teaches you what you need to know and to do when the comforts and supports of life have been swept away. Our times are not so far removed from the Godless irrationality that swept across France in Fr. Grou's day. That's why, in our own tumultuous age, *The Spiritual Life* is so desperately needed. It's the one guide that offers you real help to navigate the treacherous spiritual waters of today's world, and to keep the Faith
