

Read Book Creating Change For Complex Children And Their Families A Multi Disciplinary Approach To Multi Family Work Free Download Pdf

The Children of Divorce (Youth, Family, and Culture) Nov 10 2021 Why does divorce cause so much strain and long-term distress for children of all ages? Andrew Root, a recognized authority on youth ministry and a child of divorce himself, explains that divorce causes children to question their core identity. Since a child is the product of the union of a mother and father, when that union ends, he or she experiences a baffling sense of loss of self—a loss of his or her very sense of being. Root redirects efforts for assisting children of divorce to first address this fundamental experience. This unique book examines the impact of divorce not only from a theological and spiritual perspective but also from a young person's perspective. It will benefit those who have experienced divorce and those who minister to children of divorce.

Far From The Tree Apr 22 2020 **WINNER OF THE WELLCOME BOOK PRIZE 2014** A NEW YORK TIMES BESTSELLER Sometimes your child - the most familiar person of all - is radically different from you. The saying goes that the apple doesn't fall far from the tree. But what happens when it does? Drawing on interviews with over three hundred families, covering subjects including deafness, dwarfs, Down's Syndrome, Autism, Schizophrenia, disability, prodigies, children born of rape, children convicted of crime and transgender people, Andrew Solomon documents ordinary people making courageous choices. Difference is potentially isolating, but Far from the Tree celebrates repeated triumphs of human love and compassion to show that the shared experience of difference is what unites us. Winner of the National Book Critics Circle Award for General Non-fiction and eleven other national awards. Winner of the Green Carnation Prize.

Children and Their Environments Jan 24 2023 This fascinating book examines theories of children's perceptions of space and place and explores how these theories are applied to the world of children. The focus is on children in large real world spaces; places that children live in, explore and learn from. An international team of authors compare the experiences of children from different cultures and backgrounds. This book will appeal to environmental and developmental psychologists and geographers, and also to planners by linking research on children's understandings and on their daily lives to recommendations for practice.

God Made All of Me Feb 13 2022 God Made All of Me by Justin and Lindsey Holcomb is an invaluable resource and beautifully illustrated story to help families talk about sensitive issues with two- to eight-year-old children. Because the private parts of our bodies are private, home is the ideal environment for a child to learn about his or her body and how it should be treated by others—without conveying a message of shame. Through carefully written language and relatable storytelling, God Made All of Me helps parents navigate discussion that can so easily be warped into confusion, embarrassment, and secrecy. Instead of instilling a message that their bodies are shameful—which can often prevent children from recognizing and reporting sexual abuse—Justin and Lindsey Holcomb equip parents to build a first line of defense against sexual abuse in the safety of their own homes. This helpful guide starts from the fundamental truth that God created everything and applies that truth—the doctrine of creation—to kids and their bodies. With the help of God Made All of Me, parents and caregivers can begin conversations with boys and girls about their bodies, helping kids understand the difference between the appropriate and inappropriate touch of others. This life-changing resource shows readers how to establish the foundation for a healthy bond with their children to meet increasing challenges of sexuality, which they will inevitably confront in childhood and adolescence. By teaching their children how to establish body and health boundaries, parents are imparting invaluable skills for their kids to express thoughts and feelings. God Made All of Me is the first children's book written by Rid of My Disgrace authors, Justin and Lindsey Holcomb. Parents of young children themselves, the Holcombs are profoundly aware of the dangers kids face, and they regularly counsel victims of sexual abuse. Explore God Made All of Me and find encouragement, clear guidance, and the tools necessary to facilitate open conversations about how your children can protect their bodies, an important step in keeping them as safe as possible.

Parents with Mental and/or Substance Use Disorders and their Children Mar 22 2020 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Professionalism in the Interdisciplinary Early Years Team Apr 03 2021 Professionals are no longer restricted by particular spaces or areas of knowledge and interprofessionalism is the key to delivering effective and efficient child focused services in challenging times. Professionalism in the Interdisciplinary Early Years Team celebrates the professionalism of the varied practitioners who work with young children, bringing together contributions from academics and practitioners to share knowledge and expertise about the key services for young children and their families. This accessible guide covers the key issues faced by early years practitioners, and moves on to consider particular roles within the early years team, including the early years professional, early years teacher, health professional, social worker, speech and language therapist and librarian. The role each member of the early years team plays is explored, looking at professionalism through the dimensions of knowledge, education, skills, autonomy, values, ethics, reward. This text will be invaluable to those studying early years at undergraduate and postgraduate levels. It will also be a useful resource for leaders in early years settings and established early years practitioners who are undertaking continuing professional development courses.

How to be a Parent Apr 15 2022 This is a parenting book for people who don't buy parenting books With straight-talking advice from renowned Psychotherapist Philippa Perry, How to be a Parent is the definitive guide for any parent looking to navigate their past, avoid repeating mistakes, and ensure they don't land their own kids in therapy. Through the combination of case studies, and therapeutic insight gained from over 20 years of working directly with clients, Perry tackles the wider issues of what it actually means to be a parent, rather than getting bogged down in the little details. This isn't a book about meeting developmental milestones, training your child to have enviable manners, or how to get the much idealised 'perfect' family, it's about creating functional relationships with your children so that they grow up feeling secure, knowing who they are and what they want - giving both them and you a shot at real happiness. Full of refreshing, sage and sane advice on the bigger picture of parenthood, How to be a Parent is the only book you'll ever really need to ensure you don't mess your kids up.

Parenting Matters Feb 25 2023 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Teaching and Learning in the Early Years Feb 01 2021 How can we help children to become independent learners? The third edition of this invaluable companion for Early Years practitioners provides a broad-ranging and up-to-date review of current thinking and best practice within Foundation Stage and Key Stage 1 education. Based on the basic truth that an effective Early Years curriculum must start with the children, this book focuses on their needs and their potential. The best teaching must have a strong element of fun, wonder and excitement: David Whitebread and Penny Coltman show how play is a crucial part of this. Each chapter combines a review of important principles with practical and inspiring classroom examples. This third edition has been fully revised and updated in light of the introduction of the Early Years Foundation Stage, and includes completely new chapters concerned with classroom organisation to support independent learning, outdoor learning, speaking and listening and mathematics in the early years. The authors review all major areas of the Foundation Stage and Key Stage 1 curriculum and a range of basic issues and principles, including: an analysis of current research into how children learn discussions of general issues such as classroom organisation, curriculum management, and assessment a detailed section on play and language chapters covering individual curriculum areas across all six Foundation Stage areas of learning and across the areas of the Key Stage 1 National Curriculum The book is essential reading for all Foundation Stage and Key Stage 1 trainee teachers, their tutors and mentors, and serving teachers working with children in the three to seven age range wishing to reflect upon and develop their practice.

Parenting for a Digital Future Sep 27 2020 "In the decades it takes to bring up a child, parents face challenges that are both helped and hindered by the fact that they are living through a period of unprecedented digital innovation. Drawing on extensive research with diverse parents, this book reveals how digital technologies give personal and political parenting struggles a distinctive character, as parents determine how to forge new territory with little precedent, or support. The book reveals the pincer movement of parenting in late modernity. Parents are both more burdened with responsibilities and charged with respecting the agency of their child-leaving much to negotiate in today's "democratic" families. The book charts how parents now often enact authority and values through digital technologies—as "screen time," games, or social media become ways of both being together and setting boundaries. The authors show how digital technologies introduce both valued opportunities and new sources of risk. To light their way, parents comb through the hazy memories of their own childhoods and look toward varied imagined futures. This results in deeply diverse parenting in the present, as parents move between embracing, resisting, or balancing the role of technology in their own and their children's lives. This book moves beyond the panicky headlines to offer a deeply researched exploration of what it means to parent in a period of significant social and technological change. Drawing on qualitative and quantitative research in the United Kingdom, the book offers conclusions and insights relevant to parents, policymakers, educators, and researchers everywhere"--

Children and Their Development Aug 27 2020

The Children's Book Dec 23 2022 Famous author Olive Wellwood writes a special private book, bound in different colours, for each of her children. In their rambling house near Romney Marsh they play in a story-book world - but their lives, and those of their rich cousins and their friends, the son and daughter of a curator at the new Victoria and Albert Museum, are already inscribed with mystery. Each family carries its own secrets. They grow up in the golden summers of Edwardian times, but as the sons rebel against their parents and the girls dream of independent futures, they are unaware that in the darkness ahead they will be betrayed unintentionally by the adults who love them. This is the children's book.

I've been a Gipsying May 24 2020 'I've been a Gipsying' is intended to educate readers about the lives of a group of nomadic individuals commonly called 'Gypsy' prior to the 20th to 21st century. It covers both the lives of the average man and woman to what can be considered the tribe leader of the Gypsies, which they call The King or Queen of the Gypsy.

Working with Children Aged 0–3 and Their Families Nov 22 2022 This inspiring book shows how Early Years staff can support the best possible practice for children under three and their families whilst making use of the limited funding available. Promoting the idea of infants as powerful learners, the authors focus on 0-3 years as the vital first phase of education and care, which can require a very specific pedagogical approach. They discuss the principles that underpin the practice of working with the youngest children, the critical nature of highly effective pedagogical practice and the important role of family workers in building relationships with parents and the extended family. Working with Children Aged 0–3 and Their Families explores the challenges and responsibilities of working with young children and communicates the 'Pen Green approach'. Pen Green has become a focal point for Early Years professionals due to its outstanding Early Years provision. The innovative approach chronicled in this book will encourage practitioners to research their own practice and use the outcomes to create a radical, unique and yet highly effective provision for infants, toddlers and their families. The book will be of interest to Early Years professionals, foundation and undergraduate students, and early childhood educators.

Minding the Child Jul 26 2020 What is 'mentalization'? How can this concept be applied to clinical work with children, young people and families? What will help therapists working with children and families to 'keep the mind in mind'? Why does it matter if a parent can 'see themselves from the outside, and their child from the inside'? Minding the Child considers the implications of the concept of mentalization for a range of therapeutic interventions with children and families. Mentalization, and the empirical research which has supported it, now plays a significant role in a range of psychotherapies for adults. In this book we see how these rich ideas about the development of the self and interpersonal relatedness can help to foster the emotional well-being of children and

young people in clinical practice and a range of other settings. With contributions from a range of international experts, the three main sections of the book explore: • the concept of mentalization from a theoretical and research perspective • the value of mentalization-based interventions within child mental health services • the application of mentalizing ideas to work in community settings. Minding the Child will be of particular interest to clinicians and those working therapeutically with children and families, but it will also be of interest to academics and students interested in child and adolescent mental health, developmental psychology and the study of social cognition.

Behold the Child Aug 07 2021 Aimed at anyone interested in the history of children's literature, this book also offers the general reader an insight into the changing face of American childhood through three centuries.

Promoting the Health of Children in Public Care Jan 12 2022 For many years, health services have struggled to meet the needs of looked after and adopted children. The majority enter care due to neglect and abuse, with the consequent effects of these experiences on their health and well-being, exacerbated by the effects of separation from their birth family and subsequent placement moves. This much needed anthology is an essential guide to good practice in the field of the health promotion of looked after and adopted children.

Raising Children in a Digital Age Mar 02 2021 As featured on The Steve Wright Show on Radio 2. Equipping children to thrive and survive in the digital jungle Digital technology, social media, and online gaming are now a universal part of childhood. But are you worried about what your children might be doing online? What they might come across by accident? Or who might try to contact them through Facebook or Twitter? Whether you are a parent, grandparent, teacher, or youth leader, you will want children to get the most out of new technology. But how do you tread the tightrope of keeping them safe online, whilst enabling them to seize and benefit from the wealth of opportunities on offer? Bex Lewis, an expert in social media and digital innovation, has written a much-needed and timely book full of sound research, practical tips, and realistic advice on how to keep children safe online. She puts the Internet scare stories and distorted statistics into context and offers clear and sensible guidelines to help children thrive in the digital jungle. Media coverage includes: BBC Radio 2: The Steve Wright Show, BBC Radio Tees, BBC Radio Newcastle, ITV Tyne Tees television, Real Radio, Sun FM, The Durham Times, The Northern Echo, The Sunderland Echo, Premier Radio.

The Nurture Assumption Oct 17 2019 Harris takes on the "experts" and boldly questions conventional wisdom of parents' role in their children's lives, asserting that it's not the home environment that shapes children, but the environment they share with their peers.

Understanding Attachment Injuries in Children and How to Help: a Guide for Parents and Caregivers Dec 31 2020

Parenting A Child With Difficulties In Learning Caused By Trauma Jun 17 2022 Children who are looked after or adopted may experience varieties of learning difficulties that are caused by the trauma and disruptive relationships that marked their early lives. This book provides authoritative, clinical guidance for carers and adopters on why these learning difficulties can occur and what can be done about them. In straightforward language, it explains how children's difficult early experiences can affect their learning; the importance of play to being able to learn; how to understand what the child is experiencing and why, and how carers and parents can help.

Involving Parents in their Children's Learning Jun 24 2020 `A unique guide for students, practitioners, parents, and administrators of young children who want to understand specific strategies to maximise parent involvement and collaboration' - Education Libraries 'This is an excellent book that draws extensively on the work of a children's centre that has been running for over 25 years' - SENCO Update Involving Parents in their Children's Learning is the story of the pioneering work of the Pen Green Centre for children and families. Showing how early years practitioners can collaborate effectively with parents, the book includes case studies of parents and children who have attended the centre, studies which chart developments in learning for both children and parents. The book will inspire early years practitioners and offer them practical advice on ways of developing effective work with parents. Drawing on their work at the renowned Pen Green Centre, the authors show how to: o support parents as their child's first educator o provide practical and psychological support to parents o involve fathers and male carers o share important child development concepts o support and extend children's learning o reach out to hard-to-reach parents. This New Edition follows up on the stories of people featured in the first edition, showing how they have progressed over the last few years. It also includes new chapters covering the headteacher's role in developing parental involvement programmes, how the Pen Green model has been applied in primary schools, and the use of parental diaries. The book is essential reading for students on early years courses (BA, FdA, B.Ed), as well as practising early years professionals and senior management teams in primary schools.

The Social Child Oct 29 2020 This tutorial textbook on child psychology includes chapters by academics in research areas as diverse as evolutionary and cross-cultural psychology, behavioural genetics, social cognition, and media influence on child behaviour.

Children's Health, the Nation's Wealth May 04 2021 Children's health has clearly improved over the past several decades. Significant and positive gains have been made in lowering rates of infant mortality and morbidity from infectious diseases and accidental causes, improved access to health care, and reduction in the effects of environmental contaminants such as lead. Yet major questions still remain about how to assess the status of children's health, what factors should be monitored, and the appropriate measurement tools that should be used. Children's Health, the Nation's Wealth: Assessing and Improving Child Health provides a detailed examination of the information about children's health that is needed to help policy makers and program providers at the federal, state, and local levels. In order to improve children's health-and, thus, the health of future generations-it is critical to have data that can be used to assess both current conditions and possible future threats to children's health. This compelling book describes what is known about the health of children and what is needed to expand the knowledge. By strategically improving the health of children, we ensure healthier future generations to come.

Hong Kong's Young Children Oct 09 2021 Written for local students of early childhood education, kindergarten teachers and child care workers, this book presents a detailed picture of normal early child development in Hong Kong. The information will help the understanding of Chinese children aged between three and six years, and can be used to prepare developmentally appropriate learning activities.

Understanding Schemas and Emotion in Early Childhood Dec 19 2019 This book makes explicit connections between young children's spontaneous repeated actions, and their representations of their emotional worlds. Drawing on the literature on schemas, attachment theory and family contexts, the author takes schema theory into the territory of the emotions, making it relevant to the social and emotional development strand in early childhood education. Based on research carried out alongside children, parents, workers and co-researchers at the world-famous Pen Green Nursery, and using case studies of a small number of individual children, the author shows new links between cognition and affect. The book includes a brief summary of a method of Child Study, using video and reflections on video sequences. This book will be of interest to students and practitioners on Early Childhood undergraduate and postgraduate courses, as well as those taking modules on schema theory.

Parenting the Conundrum Child Nov 29 2020 There's nothing wrong with your child! Stop worrying! No matter how often your friends and family may say this, if you know that your child is developing differently from their peers, it's time to stand up for your conundrum child. When you have a child with additional needs, what's important is not that they get top marks or play rugby for the first team: it's that they are able to get changed quickly enough after PE or have a friend round on a stress-free playdate. Use the CAN approach to help your child Connect, Achieve and Navigate their way to independence. This book gives you the strategies you need to: - Connect with yourself and your child - Ditch the parent guilt - Help your child achieve goals and cope with new situations - Understand how to get what you need from healthcare professionals - Help your child develop the skills they need to enjoy life to the full

Children, Their World, Their Education Jul 06 2021 'Children, Their World, Their Education' presents the findings and recommendations of the Cambridge Primary Review.

Young Children in the World and Their Rights May 16 2022 This book provides different perspectives on the concept of children's rights, including policy, educational, and children's perspectives. It examines how the crucial ideas of the Convention on the Rights of the Child are respected and implemented in 14 countries in five regions of the world. It looks at early childhood education, children's participatory rights, and at how these rights are promoted and guaranteed in different countries. It explores the professional practice of education and its complexities, challenges and dilemmas, as well as the role of play, and of listening and participation. The book advocates children's rights today, arguing for its vital importance, in the best interests of the children. In doing so, it furthers the understanding of children's rights and spreads knowledge about the Convention, as a means of celebrating its 30th anniversary. The UN Convention on the Rights of the Child (UNCRC) comprises the potential to change the lives of children to the very best. It may exalt children from the position of marginalized citizens to the centre of policies all over the world. Even though the concept of children's rights is omnipresent, the respect for children's rights must be discussed. While the Convention brings the new perspective of children as citizens to the world, there are still challenges in its application. The book interrogates challenges in understanding and applying children rights and offers possible answers to these challenges. The ratification process itself, does not guarantee that children's rights are respected. While all adults should take responsibility for implementing the UNCRC in everyday life, Early Childhood Education should give opportunities for children to learn and live their rights.

(M)othering Labeled Children Feb 19 2020 This book takes a distinctive approach to exploring the experiences and identities of minoritized Latinx mothers who are raising a child who is labeled as both an emergent bilingual and dis/abled. It showcases relationships between families and schools and reveals the myriad of ways in which school-based decisions regarding disability, language and academic placement impact family dynamics. Treating the mothers as experts, this book uses testimonios to explore not only what mothers know but also how they develop funds of knowledge and how they apply them to their child's education. The stories shed light on how mothers perceive their child's disability, how they engage with their child and the value they place on bilingualism. The narratives reveal the complex lives mothers lead and the ways in which they strive to meet the academic and socioemotional needs of their children, regardless of the financial, physical and emotional costs to them. This book has significant implications for researchers and professionals working in bilingual education, special education, inclusive education and disability studies in education.

Children, Family and the State Sep 20 2022 Different theories of childhood, children's rights and the relationships between children, parents and state are examined. The care system and the extent to which children have been, and are involved in decisions is the main focus.

No Means No! Jan 20 2020 This book is about an empowered little girl who has a very strong and clear voice in all issues, especially those relating to her body and personal boundaries. It is a springboard for discussions regarding consent and children's choices and rights. The Note to the Reader and Discussion Questions guide and enhance this essential discussion. Ages 2-9

Children and Their Books Sep 08 2021 "Children and Their Books" by James Hosmer Penniman. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten?or yet undiscovered gems?of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Children's Views on Their Lives and Well-being Aug 19 2022 This book presents a comprehensive overview of findings from the Children's Worlds project – the most extensive and diverse study to have been conducted globally on children's own views of their lives. It provides a unique comparative insight into the similarities and differences in children's lives and well-being around the world, including findings that challenge prevailing assumptions of where, and in what contexts, children might experience a 'good childhood'. The book draws out the key messages and implications from the study and identifies directions for future work on child well-being. It will be of interest to researchers and students in the field of childhood studies, as well as a wide range of professionals and organisations concerned with improving children's quality of life.

How and Why to Read and Create Children's Digital Books Oct 21 2022 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and

Education, Sheffield Hallam University

[Learning to Teach in the Primary School](#) Nov 17 2019 Flexible, effective and creative primary school teachers require subject knowledge, an understanding of their pupils and how they learn, a range of strategies for managing behaviour and organising environments for learning, and the ability to respond to dynamic classroom situations. This third edition of Learning to Teach in the Primary School is fully updated with reference to the new National Curriculum, and has been revised to provide even more practical advice and guidance to trainee primary teachers. Twenty-two new authors have been involved and connections are now made to Northern Irish, Welsh and Scottish policies. In addition, five new units have been included on: making the most of your placement play and exploration in learning behaviour management special educational needs phonics. With Masters-level reflective tasks and suggestions for research-based further reading, the book provides valuable support to trainee teachers engaged in learning through school-based experience and through reading, discussion and reflections as part of a teacher education course. It provides an accessible and engaging introduction to knowledge about teaching and learning that every student teacher needs to acquire in order to gain qualified teacher status (QTS). This comprehensive textbook is essential reading for all students training to be primary school teachers, including those on undergraduate teacher training courses (BEd, BA with QTS, BSc with QTS), postgraduate teacher training courses (PGCE, SCITT) and employment-based teacher training courses (Schools Direct, Teach First), plus those studying Education Studies. This textbook is supported by a free companion website with additional resources for instructors and students and can be accessed at www.routledge.com/cw/Cremin.

Transforming the Workforce for Children Birth Through Age 8 Mar 14 2022 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

When Children Die Jun 05 2021 The death of a child is a special sorrow. No matter the circumstances, a child's death is a life-altering experience. Except for the child who dies suddenly and without forewarning, physicians, nurses, and other medical personnel usually play a central role in the lives of children who die and their families. At best, these professionals will exemplify "medicine with a heart." At worst, families' encounters with the health care system will leave them with enduring painful memories, anger, and regrets. When Children Die examines what we know about the needs of these children and their families, the extent to which such needs are "and are not" being met, and what can be done to provide more competent, compassionate, and consistent care. The book offers recommendations for involving child patients in treatment decisions, communicating with parents, strengthening the organization and delivery of services, developing support programs for bereaved families, improving public and private insurance, training health professionals, and more. It argues that taking these steps will improve the care of children who survive as well as those who do not and will likewise help all families who suffer with their seriously ill or injured child. Featuring illustrative case histories, the book discusses patterns of childhood death and explores the basic elements of physical, emotional, spiritual, and practical care for children and families experiencing a child's life-threatening illness or injury.

Children as Agents in Their Worlds Jul 18 2022 Are children the passive recipients of influence from their parents and from society? Is their development determined by their genes and their neurons, or do they have the capacity to think about and influence their own lives and the world around them? How does their interaction with their social and material worlds support or hinder agency? Are children agents, and what do we mean by agency? Children as Agents in Their Worlds aims to answer these questions through a critical psychological and relational approach, while referencing and critiquing a wide range of perspectives from other disciplines including sociology, anthropology and education. Greene and Nixon review the pioneering work of scholars of childhood studies and current post-human theories of agency and offer a developmental perspective on the emergence of the sense of agency and the exercise of agency in children. They discuss key themes including agency in families, agency within the school context and with peers, and children as agents in the wider public sphere. They explore agency and diversity, examining sex, age, genetic inheritance and contextual sources of difference, such as social class and geographical location. Offering a stronger theoretical base for research and policy, through a synthesis of both psychological and relational theories, Children as Agents in Their Worlds will be essential reading for students and professionals in developmental psychology, sociology and anthropology, as well as education, childhood studies, children's rights and related fields.

Imaginary Companions and the Children who Create Them Dec 11 2021 Marjorie Taylor provides an informed look at current thinking about pretend friends, dispelling any myths about them. Not only are imaginary companions surprisingly common, the children who have them tend to be less shy than other children, and are also better able to focus their attention and to see things from another person's perspective.
