View more details of this book at www.walkerbooks.com.au. New Yorker magazine staff writer Paige Williams delves into the surprisingly perilous world of fossil collectors in this riveting true tale. In 2012, a New York auction catalogue boasted an unusual offering: 'a superb Tyrannosaurus skeleton'. In fact, Lot 49135 consisted of a nearly complete T. bataar — a close cousin to the more-famous T. rex — that had been unearthed in Mongolia. At 2.4 metres high and 7.3 metres long, the specimen was spectacular, and the winning bid was over \$1 million. Eric Prokopi, a 38-year-old Floridian, had brought this extraordinary skeleton to market. A one-time swimmer who'd spent his teenage years diving for shark teeth, Prokopi's singular obsession with fossils fuelled a thriving business, hunting for, preparing, and selling specimens to clients ranging from natural-history museums to avid private collectors like Leonardo DiCaprio. But had Prokopi gone too far this time? As the T. bataar went to auction, a network of paleontologists alerted the government of Mongolia to the eye-catching lot. An international custody battle ensued, with Prokopi watching as his own world unravelled. The Dinosaur Artist is a stunning work of narrative journalism about humans' relationship with natural history, and about a seemingly intractable conflict between science and commerce. A story that stretches from Florida's Land O' Lakes to the Gobi Desert, The Dinosaur Artist illuminates the history of fossil collecting — a murky, sometimes risky business, populated by eccentrics and obsessives, where the lines between poacher and hunter, collector and smuggler, and enthusiast and opportunist can easily blur. Fun with the Family Texas leads the way to historical attractions, children's museums, festivals, parks, and much more. Dinosaurs from a finicky stegosaurus and a knobby old ankylosaur to the frightening tyrannosaurus rex get washed and shined at the Dino Wash Deluxe. Includes section with facts about the dinosaurs mentioned in the story. Where the Paluxy River now winds through the North Texas Hill Country, the great lizards of prehistory once roamed, leaving their impressive footprints deep in the limy sludge of what would become the earth's Cretaceous layer. It wouldn't be until a summer day in 1909, however, when young George Adams went splashing along the creekbed, that chance and shifting sediments would reveal these stony traces of an ancient past. Young Adams's first discovery of dinosaur tracks in the Paluxy River Valley, near the small community of Glen Rose, Texas, came more than one hundred million years after the reign of the dinosaurs. During this prehistoric era, herds of lumbering "sauropods" and tri-toed, carnivorous "theropods" made their way along what was then an ancient "dinosaur highway." Today, their long-ago footsteps are immortalized in the limestone of the riverbed, arousing the curiosity of picnickers and paleontologists alike. Indeed, nearly a century after their first discovery, the "stony oddities" of Somervell County continue to draw Saturday-afternoon tourists, renowned scholars, and dinosaur enthusiasts from across the nation and around the globe. In her careful, and colorful, history of Dinosaur Valley State Park, Jasinski deftly interweaves millennia of geological time with local legend, old photographs, and quirky anecdotes of the people who have called the valley home. Beginning with the valley's "first visitors"—the dinosaurs—Jasinski traces the area's history through to the decades of the twentieth century, when new track sites continued to be discovered, and visitors and locals continued to leave their own material imprint upon the changing landscape. The book reaches its culmination in the account of the hard-won battle fought by Somervell residents and officials during the latter decades of the century to secure Dinosaur Valley's preservation as a state park. The author recounts his trials and successes in directing his first big film. He was determined to make it a step above the normal low-budget fare, with special effects and an original soundtrack. Little did he realize that it would take five years, a mortgage on his house, and myriad of problems with temperamental actors and actresses, cast and crew changes, and an aggravated lizard. Includes bandw photos and a complete shooting script. Annotation copyrighted by Book News, Inc., Portland, OR The second brilliant book in the Jack Beechwhistle series. The world's a dangerous place. Veteran illustrator Joe Mathieu's dinomite illustrations and Jon Sural's saur-ing verse will have kids roaring with laughter as they romp through this funny rhyming Beginner Book. Originally created by Dr. Seuss, Beginner Books encourage children to read all by themselves, with simple words and illustrations that give clues to their meaning. During the 2010s, science fiction's immortal adversaries King Kong and Godzilla, representing our conflicts per Carl Sagan's "dream dragons" analogy, made comebacks in American cinema. The blockbuster Kaiju resurged onto the screen, depicting these protectors of an Earth plagued by mankind's hubris and folly. With Earth's future hanging in the balance, their climactic 2021 staging settled a score between the two giant monsters, resolving Toho's classic 1963 film King Kong vs. Godzilla. As formidable creatures emerging from Time's Tomb on Mother Earth, metaphorical Kong and Godzilla are considered here in light of new millennial environmentalism's stark reality. This book, nostalgic in tone, explores the meaning of Kong and Godzilla as planetary saviors--titanic protectors of a theoretical "living Earth" Gaia--defending the globe from a prehistoric plague of adversaries. A young man Jeff Martin joins Starpol (the Star Police Force) and is sent to Space Patrol Ship Hunter 5 captained by an American, Chuck Grant. Jeff finds that all is not as it should be when he encounters the Shadow who is pointing a gun at him. When in pursuit of diamond thieves Hunter 5 arrives at Omega 2, a hitherto unexplored planet, Jeff and his French colleague Anna discover just what might have happened on Earth if the dinosaurs had not been wiped out. On a further mission to Planet Ka the crew find themselves in the strange land of the Kels, obliged to deal with their formidable leader, the Great Mother. (The sci-fi stories are developed from those in the popular Starpol English Reader Series). Offers compelling insight into how designer Eastwood battled government bureaucrats, corporate patrons, and fellow hydraulic engineers to build seventeen dams in the western U.S. during the early twentieth century based on his innovative multiple-arch design. Reprint. Middle school readers can journey into the prehistoric world of tyrannosaurs and discover what it was like to excavate the world's largest T. rex skeleton. From classics like King Kong, to beloved B-movies like The Beast from 20,000 Fathoms, to blockbusters like Jurassic Park, it's easy to see that filmmakers and audiences alike love to see dinosaurs on the screen. This comprehensive filmography, arranged alphabetically by title, contains entries that include basic facts (year of release, country of origin,

studio, and running time), followed by a concise plot summary, the author’s critical commentary, information on the production and the people behind it, and secrets of the often-ingenious special effects. Three useful appendices feature films with minor dinosaur content, planned but unfinished dinosaur movies, and the quasi-dinosaurs of Toho Studios. To be included, a movie must depict one or more representations of a “prehistoric reptile.” Inaccurate portrayals are included, as long as the intent is to represent a real or fictional dinosaur. Not eligible are films featuring prehistoric mammals, prehistoric humans or humanoids, and beasts of mythology—unless, of course, the movie also has a dinosaur. When the dinosaurs of the Great Valley wake up to find themselves covered with "white ground sparkles," the prehistoric lizard kids have snowball fights, but the adults understand the threat to their food supply. So when a traveling family of spiketails (Stegosauruses) offers to take Spike with them in search of warmer climes and more munchies, his adoptive mother reluctantly agrees. But his adoptive sister Ducky sets off after him and the rest of the playmates form a rescue party joined by the blustering elder, Mr. Thicknose (the voice of Robert Guillaume). The small band faces a T-Rex, landslides, blizzards, wind shear on Petrie the Pterosaur's wings and, finally, ice skating into hot springs, which ultimately save the valley's dino denizens. As with its predecessors, this 72-minute film combines a little science and song with a lot of life instruction for the preschool and grade-school crowd. (Ages 3 to 7). A virtual reality prank that goes terrifyingly wrong; a desperate father who will go to any lengths to stop his estranged wife from getting custody of their daughter; a brutal TV reality show that destroys one life too many. All these eight stories of the extraordinary, never before published, reflect the dangers and horrors implicit in the way we live our lives today, the dark side of 21st century life. All contain subtle twists in the tail, guaranteed to have you on the edge of your chair.
