Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. On August 26th, 2005, I traveled with my two sons to Auschwitz, the Nazi death camp where over one million Jews were killed. The three of us made the trip by train, just as my parents were forced to do in 1942, first my father, with convoy 4 and later my mother with convoy 24. At the time of their deportation I was 8 and a half years old. I have written this story to ensure that my parents' lives: struggles, triumphs and final journey - as well as that of thousands of others – will be remembered for generations to come. In 2006, whilst working in a full-time job, James Schramko wrote this in a notebook: MY GOALS ... create automated income so that I am independently wealthy and enjoy my life passionately. Within three years, he'd built his own business and achieved those goals. At which point he set about helping his coaching clients do the same. Leveraging his knowledge and experience, they were able to make more money while reducing their work hours. Significantly. This freed them up to spend more time living. lifeThis book is for you if you are: - A business owner (big or small)- Currently in a job with a hard ceiling on how much you can earn- Overworked and underpaid- Stressed out and missing out on precious time with family and friends.If you want to build a business that gives you financial peace of mind while allowing you to enjoy life NOW, not later ... Work Less, Make More will get you on your way. It will help ensure the business you're building will work for you, not the other way a This is a captivating chronicle of the fifty-year "David-Goliath" struggle between the bosses of Big Labor and Americans opposed to their coercive power.Few Americans realize their freedom to say "no" to compulsory unionism is largely the result of the valiant efforts of the National Right to Work Committee and its Legal Defense Foundation. Big business and the Republican Party have usually avoided the battle, leaving only Right to Work and its hundreds of thousands of grass roots supporters to defend employee freedom to get or keep their jobs without being forced to pay dues or join a union.Leef's narrative covers the New Deal legislation that gave Big Labor its initial monopoly power, and then the inspiring, decades-long struggle in Washington and the states to reduce the abusive power of labor bosses.The book also teaches a crucial lesson for those involved in public policy wars, regardless of their political philosophy -- that principled and dedicated idealists can prevail against strong special interest groups if they fight for a just cause. Focusing on posting of workers, where workers employed in one country are send to work in another country, this edited volume is at the nexus of industrial relations and European Union studies. The central aim is to understand how the regulatory regime of worker "posting" is driving institutional changes to national industrial relations systems. In the introduction, the editors develop a framework for understanding the relationship of supra-national EU regulation, transnational actors and national industrial relations systems, which we then apply in the empirical chapters. This unique volume brings together scholars from diverse academic fields, all of whom are experts on the topic of "worker posting." The book examines different aspects of the posting debate, including the interactions of actors such as labour inspectorates, trade unions, European legal/political regulators, manpower firms, transnational subcontractors and posted workers. The main objective of this book is to explore the dynamics of

institutional change, by showing how trans- and supra-national dynamics affect European industrial relations systems. This volume will represent the "state of the art" in research on worker posting. It will also contribute to debates on European integration, social dumping, labour market dualization and precariousness and will be of value to those with an interest employment relations, law and regulation. New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea. No one is immune to the byproducts of compulsory schooling and standardized testing. And while reform may be a worthy cause for some, it is not enough for countless others still trying to navigate the tyranny of what schooling has always been. Raising Free People argues that we need to build and work within systems truly designed for any human to learn, grow, socialize, and thrive, regardless of age, ability, background, or access to money. Families and conscious organizations across the world are healing generations of school wounds by pivoting into self-directed, intentional community-building, and Raising Free People shows you exactly how unschooling can help facilitate this process. Individual experiences influence our approach to parenting and education, so we need more than the rules, tools, and "bad adult" guilt trips found in so many parenting and education books. We need to reach behind our behaviors to seek and find our triggers; to examine and interrupt the ways that social issues such as colonization still wreak havoc on our ability to trust ourselves, let alone children. Raising Free People explores examples of the transition from school or homeschooling to unschooling, how single parents and people facing financial challenges unschool successfully, and the ways unschooling allows us to address generational trauma and unlearn the habits we mindlessly pass on to children. In these detailed and unabashed stories and insights, Richards examines the ways that her relationships to blackness, decolonization, and healing work all combine to form relationships and

enable community-healing strategies rooted in an unschooling practice. This is how millions of families center human connection, practice clear and honest communication, and raise children who do not grow up to feel that they narrowly survived their childhoods. A vital and timely proposal for a feminist post-work politics Would you let a robot clean your house? When we think about work, we still tend to think about workplaces - if we think about reducing work, we think about reducing working hours and spending more time at home. But the home has never been free from work, and with the continued gendered division of labour, women still do the bulk of domestic activities. As two-income families find themselves ever more time-poor, many look to outsource to cleaners, nannies, and care workers. More and more, it would seem, people are finding themselves without either the emotional or the financial resources to take care of themselves and each other. The home, rather than an escape from the work and its pressures, is in fact an extension of it. After Work is a crucial corrective to this trend, extending its attention beyond paid jobs, to the impact of domestic work upon familial relationships, social bonds, and our very conceptions of domestic space. What if we automated housework? In this groundbreaking work, Helen Hester and Nick Srnicek argue that there is a crisis that can and should be tackled. Only by rethinking the way we organise our living arrangements, redefining our domestic standards and remaining open to the automation of work done in the home, they argue, can we imagine a world that is truly post-work. Great leaders are driven to win. Yet career wins can come at great cost to your health, relationships, and personal well-being. Why does it seem impossible to both win at work and succeed at life?
