The Politics of Dental Care in Canada Mar 29 2021 Filling a gap in the health policy literature, author and dental public health specialist Dr. Carlos Quiñonez explores the complexities surrounding Canada's dental care system and policies, including how they came to be, their consequences, and what they mean for oral health and access to dental care. *The Politics of Dental Care in Canada* seeks to answer a long standing policy question in Canadian health

care: Why is dental care excluded from Canada's national system of health insurance, Medicare? The text presents a history of dentistry in Canada from the late 19th century onward, outlining how dentistry traversed a developing Canadian welfare state. Dr. Quiñonez explores factors that led to dentistry's separation from larger movements in health care policy, including moral questions on individual versus social responsibility over health, scientific advances in the field, and prevailing economic uncertainty. Opening with a series introduction by Dr. Dennis Raphael, this vital text offers an extensive overview on how the politics of dental care contributes to inequalities and inequities in oral health. From discussing scientific and public health advances in dentistry to looking at the general nature of oral health care in Canada from an international perspective, this text serves as an important addition to the field of health policy and a foundational resource for courses in dentistry, health studies, and comparative health policy. FEATURES - Comprehensively discusses the current state of Canadian dental care policy, the history and factors that led to the policy, and the resulting outcomes and inequalities - Presents the latest available information on the epidemiology of oral diseases and conditions; the connection between oral health and systemic health; and the organization, financing, and delivery of oral health care in Canada and internationally *Strained Mercy* Aug 22 2020 Health and the use of health care. Risk, uncertainty, and the limits of insurability. The community interest in health care. Market failure and the evolution of health care institutions: A historical parable. Health care firms: Providers, practices, and people. Professional practices: The not-only-for-profit firms. Hospitals and related institutions: If not-for-profit then for what? ment programs in prevention and research. Health manpower policy - leading the horses to water. Design or accident in health care policy data 900328 internet il

Better Medicine Mar 17 2020 Donner Prize-winning author Dr. David Gratzner (Code Blue) edits and introduces this collection of twelve essays on health care reform in Canada, advocating an open-minded approach to such concepts as privatization, two-tier health care, and user fees. Gratzner has assembled a stellar list of authors who invite Canadians to question their confidence in government-managed public health. Contributors include Order of Canada member and University of Toronto professor Michael Bliss, who argues that our current problems are the result of increasingly aggressive government measures to control patients and health-care providers. *Globe and Mail* columnist Margaret Wente offers vignettes that address the day-to-day problems of health care: queue jumping, excessive waits, provider burnout, aging equipment, and the politicization of health administration. And, Vancouver-based health analyst Cynthia Ramsey places Canada's health care system in an international context. Her findings are unsettling. Other contributors include McGill economist and National Post contributor William Watson, former Quebec Medical Association president Dr. Edwin Coffey, former Ontario Medical Association president Dr. William Orován, and Urban Futures Institute executive Director David Baxter. All Canadians concerned about the state of health care in Canada should read this informative and intelligent collection.

Health Systems in Transition Jan 27 2021 The health care system in Canada is much-discussed in the international sphere, but often overlooked when it comes to its highly decentralized administration and regulation. *Health Systems in Transition: Canada* provides an objective description and analysis of the public, private, and mixed components that make up health care in Canada today including the federal, provincial, intergovernmental and regional dynamics within the public system. Gregory P. Marchildon's study offers a statistical and visual description of the many facets of Canadian health care financing, administration, and service delivery, along with relevant

comparisons to five other countries' systems. This second edition includes a major update on health data and institutions, a new appendix of federal laws concerning select provincial and territorial Medicare legislation, and, for the first time, a comprehensive and searchable index. It also provides a more complete assessment of the Canadian health system based on financial protection, efficiency, equity, user experience, quality of care, and health outcomes. Balancing careful assessment, summary, and illustration, *Health Systems in Transition: Canada* is a thorough and illuminating look at one of the nation's most complex public policies and associated institutions.

Health and Health Care in Northern Canada Jan 19 2023 Accounting for almost two thirds of the country's land-mass, Northern Canada is a vast region, host to rich natural resources and a diverse cultural heritage shared across Indigenous and non-Indigenous residents. In this book, Rebecca Schiff and Helle Müller analyse health and healthcare in Northern Canada from a perspective that acknowledges the unique strengths, resilience, and innovation of northerners, while also addressing the challenges aggravated by contemporary manifestations of colonialism. Old and new forms of colonial programs and policies continue to create health and healthcare disparities in the North, which has had a profound impact on northerners. Divided into three sections, *Health and Healthcare in Northern Canada* paints a broad picture of primary issues that northern peoples face. Several chapters are written by northerners and utilize case studies, quotes, photographs, and other materials to highlight voices and perspectives of people living in northern Canada. In order to maintain resilience, improve the positive outcomes of health determinants, and diminish negative stereotypes, we must ensure that northerners - and their cultures, values, strengths and leadership - are at the centre of the ongoing work to achieve social justice and health equity.

Universal Health Care Dec 14 2019 A powerful argument for a new health-care system.

Building on Values Feb 14 2020

Health Care in Canada Feb 20 2023 *Health Care in Canada* examines the challenges faced by the Canadian health care system, a subject of

much public debate. In this book Katherine Fierlbeck provides an in-depth discussion of how health care decisions are shaped by politics and why there is so much disagreement over how to fix the system. Many Canadians point to health care as a source of national pride; others are highly critical of the system's shortcomings and call for major reform. Yet meaningful debate cannot occur without an understanding of how the system actually operates. In this overview, Fierlbeck outlines the basic framework of the health care system with reference to specific areas such as administration and governance, public health, human resources, drugs and drug policy, and mental health. She also discusses alternative models in other countries such as Britain, the United States, and France. As health care becomes increasingly complex, it is crucial that Canadians have a solid grasp of the main issues within both the policy and political environments. With its balanced and accessible assessment of the main political and theoretical debates, *Health Care in Canada* is an essential guide for anyone with a stake in Canada's health system.

Treating Health Care Jul 21 2020 Focusing on Canada's health care system, Raisa B. Deber introduces the reader to the facts and concepts necessary to understand health care policy in Canada and to evaluate how we might want to reform our health care system.

[Institutionalization of the Elderly in Canada](#) Nov 24 2020 *Institutionalization of the Elderly in Canada* provides information regarding the care of elderly people in long-term care institutions in Canada. The monograph presents the nature and operation of the system of long-term institutional care of the elderly in Canada. The book provides a definition and historical outline of institutional care; the various types of available facilities, and the populations for which these institutions are designed; and the issues concerning the interface between community-oriented services and institutions. The health and functional abilities of the elderly and the programs which may be needed for the care of the long-stay elderly resident; issues on attitudes towards institutionalization, excessive medication, inappropriate placement and divided jurisdictional responsibility; and the quality and outcomes of care and the implications of

government policy and programs are extensively discussed as well. Gerontologists, healthcare professionals, and medical administrators will find the book of value.

Health Care Policy and Opinion in the United States and Canada Mar 09 2022

Heated debate surrounds the topic of health care in both the US and in Canada. In each country, these debates are based in some measure on perceptions about health care in their neighboring country. The perceptions held by Canadians about the US health care system, or those held by Americans about Canada, end up having significant impact on health policy makers in both countries. *Health Care Policy and Opinion in the United States and Canada* examines these perceptions and their effects using an extensive cross-national survey made up of two public opinion polls of over 3,500 respondents from the US and Canada. The book first develops a rigorous and detailed explanation of the factors that contribute to levels of satisfaction among Americans and Canadians with respect to their health care systems. It then attempts to study the perceptions of Canadians vis-à-vis the US health care system as well as the perception of Americans toward Canada's health care system. The authors examine how these perceptions impact health policy makers, and show how the survey results indicate remarkable similarities in the opinions expressed by Americans and Canadians toward the problems in the health care system, heralding perhaps a measure of convergence in the future. The authors present how perceptions on health care indicate elements of convergence or divergence between the views of Canadians and Americans, and discuss how these citizen opinions should inform health care policy change in both countries in the near future. This book should generate interest in scholars of health care, public opinion, and comparative studies of social policies and public opinion.

[Caring for Profit](#) Jul 01 2021 *Caring For Profit* traces how Canada's \$77 billion a year health care industry is turning away from its original mandate of providing the best possible medical care to Canadians, and how multinational capital is forcing its way into our non-profit health care system. In *Caring For Profit*, Colleen Fuller

traces alliances that were struck between private insurers and the medical profession during the 1950s and 1960s to defeat "socialized medicine". These alliances survived the establishment of medicare in Canada in 1968, and have been strengthened by new forces emerging in an era of globalization. Instead of a health care system focused on providing the highest quality of care to the greatest number of Canadians, the system is increasingly dominated by financial giants more concerned with consolidations, mergers, acquisitions, and higher profit margins. Caring for Profit is a "who's who" of key people and corporations making money in Canada's health care sector? and a portrait of the strategies and alliances that threaten to replace the principles of medicare with the dictates of the stock market.

The Move Toward Primary Health Care in Canada Oct 24 2020

An Introduction to Indigenous Health and Healthcare in Canada Dec 26 2020 Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. First edition named a 2013 PROSE Award Winner in Nursing and Allied Health Sciences This textbook for Canadian nursing and allied health students explores the major health issues of Indigenous populations and how to improve their overall health. The second edition addresses a key development since the first edition was published: an increasing consensus among Indigenous peoples that their health is tied to environmental determinants, both physical and philosophical. This text describes what is distinctive about Indigenous approaches to health and healing and why it should be studied as a discrete field. It provides a framework for professionals to approach Indigenous clients in a way that both respects the client's worldview while retaining a professional epistemology. Grounded in the concepts of cultural sensitivity, competency, and safety—yet filled with practical information—this book integrates historical, social, and clinical approaches illuminated by concrete examples from the field and relevant case studies. New to the Second Edition: Delivers thoroughly updated content, statistics, and coverage of political developments since 2013 Includes a complete

test bank of multiple choice, true/false, and short answer questions in each chapter Provides sample PowerPoint presentation lectures in each chapter Key Features: Authored by a leading researcher and educator in First Nations and Inuit health Serves as the only up-to-date text on Indigenous health in Canada Enhances learning with chapter objectives, critical thinking exercises, abundant primary source material, and references

Health and Healthcare in Northern Canada Dec 18 2022 Accounting for almost two-thirds of the country's land mass, northern Canada is a vast region, host to rich natural resources and a diverse cultural heritage shared across Indigenous and non-Indigenous residents. In this book, the authors analyse health and health care in northern Canada from a perspective that acknowledges the unique strengths, resilience, and innovation of northerners, while also addressing the challenges aggravated by contemporary manifestations of colonialism. Old and new forms of colonial programs and policies continue to create health and health care disparities in the North. Written by individuals who live in and study the region, *Health and Health Care in Northern Canada* utilizes case studies, interviews, photographs, and more, to highlight the lived experiences of northerners and the primary health issues that they face. In order to maintain resilience, improve the positive outcomes of health determinants, and diminish negative stereotypes, we must ensure that northerners - and their cultures, values, strengths, and leadership - are at the centre of the ongoing work to achieve social justice and health equity.

Health and Health Care Delivery in Canada Oct 16 2022 No health care professional in Canada should be without a clear understanding of the Canadian health care system! *Health and Health Care Delivery in Canada, 2nd Edition* explores the nation's basic approach to health, wellness, and illness. Set entirely within a Canadian context, this text includes coverage of individual and population health, the role of federal agencies and provincial governments, health care funding, and current issues and future trends in health care. Written by experienced educator and nurse practitioner, Valerie Thompson, this textbook is ideal for all

students beginning a career in health care. Clear, easy-to-understand approach to health care in Canada begins with an overview of health, wellness, and illness and proceeds through the fundamentals of the Canadian health care system, such as population health, ethical and legal issues, health care funding and principles, practice settings, and changing trends. Learning Outcomes outline the knowledge that you should gain in each chapter. Key Terms open each chapter and include page references for definitions. Student-friendly learning aids include summary tables and boxes, photographs, figures, and illustrations. Review questions at the end of every chapter test your comprehension of the material. Case examples provide real-world scenarios related to the chapter content. In The News boxes highlight landmark case law, research developments, emerging health issues, and ethical challenges. Thinking It Through questions ask you to critically consider key aspects of health and health care delivery. NEW! Coverage of issues and trends includes expanded information on mental health issues, aboriginal health, privatization, use of electronic health records, and interprofessional health care practice.

[Health Care Federalism in Canada](#) May 31 2021 Now that Ottawa has left health care to the provinces, what is the future for Canadian health care in a decentralized federal context? Is the Canada Health Act dead? *Health Care Federalism in Canada* provides a multi-perspective, interdisciplinary analysis of a critical juncture in Canadian public policy and the contributing factors which have led to this point. Social scientists, legal scholars, health services researchers, and decision-makers examine the shift from a system where Ottawa has played a significant, sometimes controversial role, to one where provinces have more ability to push health care design in new directions. Will this change inspire innovation and collaboration, or inequality and confusion? Providing an up-to-date analysis of health care policy and intergovernmental relations at a crucial time, *Health Care Federalism in Canada* will be of interest to anyone concerned with the current dynamics and future potential of Canadian health care. Contributors include Greg Marchildon (Canada Research Chair at the

Johnson-Shoyama Graduate School of Public Policy in Saskatchewan), Ken Boessenkool (public affairs strategist and former political advisor to Stephen Harper), Adrian Levy (Professor and Head, Department of Community Health and Epidemiology at Dalhousie University), Boris Sobolev (Canada Research Chair at the School of Public and Population Health, University of British Columbia), Gail Tomblin Murphy (Director, WHO Collaborating Centre for Health Workforce Planning and Research), and David Haardt (Department of Economics, Dalhousie University).

[Health Care in Canada](#) Jun 19 2020

The Social Dimensions of Health and Health Care in Canada May 11 2022 The Social Dimensions of Health and Health Care in Canada challenges readers to move past commonly held beliefs about health and health care to broaden their understanding of how our social world influences health and illness. In doing this, readers are introduced to a broad array of health and health care issues from different perspectives. This text aims to provide students with a better understanding of the social influences on health and health care with a particular focus on the Canadian context.

[Strategic Planning for a Sustainable System of Health Care in Canada](#) Apr 17 2020

Health Care in Canada Feb 08 2022 Health care expert Antonia Maioni condenses years of research into engaging accounts of key issues, including the financing of health care, the division of responsibilities between provinces and the federal government, and the federal government, and the founding tenets of Canada's health care system. She tells a fascinating account, weaving in explorations of Canada's political history, Medicare in the United States, and comparative examples from European systems.

Morrison-Valfre's Foundations of Mental Health Care in Canada, 1e Apr 29 2021 Build a broad fundamental knowledge of Canadian mental health concepts and disorders! Morrison-Valfre's Foundations of Mental Health Care in Canada uses an easy-to-read, multidisciplinary approach to describe current therapeutic interventions and treatments for mental health conditions. Ideal for nurses and other caregivers, this guide provides concise coverage

of skills and principles, therapeutic skills, mental health problems throughout the lifecycle, and common psychological and psychosocial conditions. Included are topics such as new research, the latest mental health legislation, and new psychotropic drugs. Adapted for a Canadian audience by Boris Bard, Eric MacMullin, and Jacqueline Williamson, this resource enables you to provide effective therapy to clients with a wide range of maladaptive behaviours. Coverage of psychotropic medications emphasizes the latest in safe pharmaceutical treatment in mental health care. Coverage of internet usage features emerging mental health issues surrounding use of the internet, highlighting related addictions and violence. Updated DSM-5 diagnoses include the latest information on new mental health diagnoses recognized by the American Psychiatric Association. Sample client care plans show how members of the health care team work collaboratively to meet client needs. Case studies use realistic client situations to strengthen critical thinking and ensure that students consider psychosocial aspects of therapeutic care. Critical Thinking boxes include practice scenarios with client issues as well as questions that stimulate more careful analysis. Cultural Consideration boxes highlight cultural issues and address the varied mental health needs of culturally diverse clients. Medication Alert boxes identify the risks and possible adverse reactions of psychotherapeutic medications. Chapter objectives focus on the most important concepts. Key terms include phonetic pronunciations and text page references, and are listed in a comprehensive glossary, making it easier for students to understand and use mental health terminology. NEW! Comprehensive coverage includes Canadian statistics, research, references and resources, guidelines, assessment and screening tools, therapies, drugs, terminology, and more. NEW! Canadian cultural considerations are included when content relates to race/ethnicity, Indigenous people, and the LGBTQ2 community. NEW! Coverage of trending topics includes medical assistance in dying (MAID), the opioid crisis, legalization of cannabis (Bill C-45, the Cannabis Act), vaping, harm reduction, violence against women, and more. NEW! Balanced

coverage of mental health care addresses a variety of workplace settings. NEW! Critical Thinking Questions are included at the end of each chapter, allowing students to apply concepts to practice.

Maternal Child Nursing Care in Canada - E-Book

Aug 02 2021 Featuring the most accurate, current, and clinically relevant information available, Perry's Maternal Child Nursing Care in Canada combines essential maternity and pediatric nursing information in one text. Comprehensive coverage includes promotion of wellness and the care for persons experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Medication Alerts stress medication safety concerns for better therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through

emergency procedures. Family-Centred Care boxes highlight the needs or concerns of families that you should consider in providing family-centred care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes.

Health Care Ethics in Canada Nov 05 2021

Building on Values Dec 06 2021 In April 2001, the Prime Minister established the Commission on the Future of Health Care in Canada. Its mandate was to review medicare, engage Canadians in a national dialogue on its future, and make recommendations to enhance the system's quality and sustainability. The 47 recommendations in this report outline actions that must be taken in 10 critical areas, starting by renewing the foundations of medicare and considering Canada's role in improving health around the world.

[The Sociology of Health, Illness, and Health Care in Canada](#) Sep 15 2022 Strohschein/Weitz'

The Sociology of Health, Illness, and Health Care in Canada: A Critical Approach, first Canadian edition is the first in its field to take a critical approach, challenging students to use their 'sociological imagination' to question previously taken-for-granted aspects about health, illness, and health care. Comprehensive, current, and thoroughly Canadian, the authors consistently encourage students to acquire for themselves the tools needed to see the world around them in a new way. As one of the largest fields in the discipline, the sociology of health and illness is vibrant, theoretically-rich and diverse. As such, The Sociology of Health, Illness, and Healthcare in Canada: A Critical Approach places nearly equal balance of the three main areas in the field: the social patterning of health and illness, the social construction of health and illness, and the social organization of health care. It introduces students not only to structural functionalism,

conflict theory and symbolic interactionism, but also to more recent theories such as Foucaultian theory, postmodernism, Bourdiesian theory and sociology of the body. The text places considerable effort into evaluating and interpreting the most current available research findings; Canadian statistics; and trends in health, creating a coherent 'story' that will engage students and stimulate active learning and independent thinking. The text's authors contextualize the sociology of health, illness, and healthcare in Canada's political, historical, and cultural landscape. At the same time, the authors examine the lessons to be learned by contrasting the Canadian situation with what occurs in the United States and other countries.

The Political and Economic Sustainability of Health Care in Canada Sep 22 2020

Canada has a complex health delivery system which is a conglomeration of 13 public plans--10 provincial and three territorial as well as a number of federally administered plans serving special populations such as Aboriginals and Veterans--all providing full coverage for most hospital and physician services as well as partial coverage for many services that vary among plans. The importance of this study is that it examines how the public/private sector relationship in health care delivery--particularly that of the for-profit sector--has developed both historically and in recent years, in three subnational provincial jurisdictions within a federal system. The case study provinces are Ontario, Quebec, and Alberta. The study examines both similarities and differences in this development. These provinces are highly distinct in their political culture and political history affecting health care delivery. Ontario and Quebec are Canada's most populous provinces and Alberta is an increasingly populous prairie state. Alberta is unique in its long-time governance of the Progressive Conservative party and its predecessor the Social Credit Party. Ontario has had a more variable political history with periods of Progressive Conservative, New Democratic Party and Liberal leadership and in recent years Quebec governance has shifted between the Parti Qu becois and the Liberal Party. In this study, one dimension that the authors examine are political dispositions to act regarding public/private initiatives in health care delivery

and how this affects health care delivery in these provinces. Provincial medical and hospital plans are constrained by the Canada Health Act of 1984. For necessary medical and hospital services, the provinces and territories must adhere to the five principles of the Act in order to receive federal funding. However for other extended health care and health care-related services, there are federal contributions that are not constrained by these principles--although subject to reporting obligations. Another factor providing some flexibility in provincial Medicare plans is that necessary hospital and medical services are not enumerated in the Canada Health Act. This has allowed some "delisting" of services which is discussed in the case studies. In the provincial case studies, the authors examine how the federal/provincial dynamic in the delivery of health care services has worked out in the three provinces, with respect to similarities and differences regarding the involvement of the for-profit sector both within and outside the respective Medicare systems. They also examine how the fiscal setting has affected both political and economic sustainability pressures with respect to inclusion of private commercial initiatives in these three provincial settings. The authors note that these initiatives occur both within and external to Canadian provincial Medicare systems and that there is a need to see that such initiatives are held publicly accountable to meet equity and access goals. The study utilizes government documents, press reports and personal interviews to draw a picture of health delivery developments within the Canadian federal context. This study adds to the comparative health policy literature by applying a comparative approach to subnational provincial cases. It is also noteworthy to note that globally, many nations' health insurance plans incorporate a mixed public and private health delivery system, albeit that the mixes of for-profit and not-for-profit organizations will vary with respect to the ideological, political, cultural and historical characteristics of various nations. This is an important book for collections in Canadian studies, political science, and public health.

Home Care Development Oct 12 2019

Health and Health Care Delivery in Canada -

E-Book May 19 2020 No health care professional in Canada should be without a clear understanding of the Canadian health care system! *Health and Health Care Delivery in Canada, 2nd Edition* explores the nation's basic approach to health, wellness, and illness. Health Care in Canada Apr 10 2022

Health Care in Canada Oct 04 2021 *Health Care in Canada* examines the challenges faced by the Canadian health care system, a subject of much public debate. In this book Katherine Fierlbeck provides an in-depth discussion of how health care decisions are shaped by politics and why there is so much disagreement over how to fix the system. Many Canadians point to health care as a source of national pride; others are highly critical of the system's shortcomings and

call for major reform. Yet meaningful debate cannot occur without an understanding of how the system actually operates. In this overview, Fierlbeck outlines the basic framework of the health care system with reference to specific areas such as administration and governance, public health, human resources, drugs and drug policy, and mental health. She also discusses alternative models in other countries such as Britain, the United States, and France. As health care becomes increasingly complex, it is crucial that Canadians have a solid grasp of the main issues within both the policy and political environments. With its balanced and accessible assessment of the main political and theoretical debates, *Health Care in Canada* is an essential guide for anyone with a stake in Canada's health system.

Better Now Jan 07 2022 Longlisted for British Columbia's National Award for Canadian Non-Fiction 2018 Dr. Danielle Martin sees the challenges in our health care system every day. As a family doctor and a hospital vice president, she observes how those deficiencies adversely affect patients. And as a health policy expert, she knows how to close those gaps. A passionate believer in the value of fairness that underpins the Canadian health care system, Dr. Martin is on a mission to improve medicare. In *Better Now*, she shows how bold fixes are both achievable and affordable. Her patients' stories and her own family's experiences illustrate the evidence she presents about what works best to improve health care for all. *Better Now* outlines "Six Big Ideas" to bolster Canada's health care system. Each one is centred on a typical Canadian patient, making it clear how close to home these issues strike.

- Ensure every Canadian has regular access to a family doctor or other primary care provider
- Bring prescription drugs under medicare
- Reduce unnecessary tests and interventions
- Reorganize health care delivery to reduce wait times and improve quality
- Implement a basic income guarantee to alleviate poverty, which is a major threat to health
- Scale up successful local innovations to a national level

Passionate, accessible, and authoritative, Dr. Martin is a fervent supporter of the best of medicare and a persuasive critic of what needs fixing.

Romanow Papers: Changing health care in

Canada Sep 03 2021 The second in a series of three volumes presenting a selection of the best studies prepared for the Romanow Commission, this volume focuses on the problem of change in health care and health systems. Combining the talents of experienced health policy experts with innovative researchers, the resulting studies provide unique perspectives on the difficult issues under scrutiny, including complexity in health systems, management of human resources, organizational control and regulation, and public engagement. Commissioned and prepared with applicability as the foremost criteria, all of the studies presented in this volume offer solutions in managing obstacles to change. Each study also includes an appraisal of the most recent literature in the field.

Hospital Care in Canada Jan 15 2020

Neglected No More Feb 25 2021 A NATIONAL BESTSELLER SHORTLISTED FOR THE BALSILLIE PRIZE FOR PUBLIC POLICY It took the coronavirus pandemic to open our eyes to the deplorable state of so many of the nation's long-term care homes: the inhumane conditions, overworked and underpaid staff, and lack of oversight. In this timely new book, esteemed health reporter André Picard reveals the full extent of the crisis in eldercare, and offers an urgently needed prescription to fix a broken system. When COVID-19 spread through seniors' residences across Canada, the impact was horrific. Along with widespread illness and a devastating death toll, the situation exposed a decades-old crisis: the shocking systemic neglect towards our elders. Called in to provide emergency care in some of the hardest-hit facilities in Ontario and Quebec, the military issued damning reports of what they encountered. And yet, the failings that were exposed--unappetizing meals, infrequent baths, overmedication, physical abuse and inadequate personal care--have persisted for years in these institutions. In *Neglected No More*, André Picard takes a hard look at how we came to embrace mass institutionalization, and lays out what can and must be done to improve the state of care for our elders, a highly vulnerable population with complex needs and little ability to advocate for themselves. Picard shows that the entire eldercare system--fragmented, underfunded and unsupported--is long overdue for a fundamental

rethink. We need to find ways to ensure seniors can age gracefully in the community for longer, with supportive home care and respite for family caregivers, and ensure that long-term care homes are not warehouses of isolation and neglect. Our elders deserve nothing less.

Health and Health Care Delivery in Canada

Jul 13 2022 Prepare for a career in Canadian health care with the only text of its kind! Written in a manageable, student-friendly style, *Health and Health Care Delivery in Canada*, 3rd Edition makes it easy to understand the nation's approach to health, wellness, and illness. Set entirely within a Canadian context, this text includes coverage of individual and population health, the role of federal agencies and provincial governments, health care funding, and current issues and future trends in health care. This new edition includes updated coverage on mental health care, Indigenous Peoples, palliative and end-of-life care (including MAID), and the legalization of marijuana. With enhanced online resources and updated review questions, it's ideal for all Canadian students considering a career in health care! Case examples provide real-world scenarios related to the chapter content. Thinking It Through questions ask you to critically consider key aspects of health and health care delivery. Review questions at the end of every chapter test your comprehension of the material. Chapter Summaries at the end of each chapter cover the main topics and their key takeaways. Key Terms open each chapter and include page references for definitions. NEW! Expanded and updated coverage on legislative and health care changes regarding mental health care, Indigenous Peoples, palliative and end-of-life care (including MAID), and the legalization of marijuana. NEW! Discussions about topical issues include the introduction of alternative and complementary health services in Canada, emergency preparedness, and e-mental health. NEW! Completely updated content in Think It Through and Case Example feature boxes. NEW! Improved organization of content introduces the role and responsibilities of federal, provincial, and territorial governments, as well as those of agencies and practitioners earlier in the text. NEW! Did You Know? boxes present real-life situations exemplifying content presented in the

chapters. NEW! Enhanced Evolve site including new TEACH lesson plans, updated and expanded Discussion Questions and Review Questions.

[An Introduction to School-Age Care in Canada](#)

Nov 17 2022 An Introduction to School-Age Care in Canada will teach you to develop programs with the children, rather than for the children. It includes strategies for developing a sense of community, and creating learning environments and experiences children find fun and challenging, while emphasizing the involvement of the children in all aspects of the program.

Paradigm Freeze Nov 12 2019 Why has health care reform proved a stumbling block for provincial governments across Canada? What efforts have been made to improve a struggling system, and how have they succeeded or failed? In *Paradigm Freeze*, experts in the field answer these fundamental questions by examining and comparing six essential policy issues - regionalization, needs-based funding, alternative payment plans, privatization, waiting lists, and prescription drug coverage - in five provinces. Noting hundreds of recommendations from dozens of reports commissioned by provincial governments over the last quarter century - the great majority to little or no avail - the book focuses on careful diagnosis, rather than unplanned treatment, of the problem. *Paradigm Freeze* is based on thirty case studies of policy reform in Alberta, Saskatchewan, Ontario, Quebec, and Newfoundland and Labrador. The contributors assess the nature and extent of healthcare reform in Canada since the beginning of the 1990s. They account for the generally limited extent of reform that has occurred, and identify the factors associated with the relatively few cases of large reform. An insightful new perspective on a problem that has plagued Canadian governments for decades, *Paradigm Freeze* is an important addition to the field of health policy. Contributors include John Church (University of Alberta), Michael Ducie (Alberta Health and Wellness), Pierre-Gerlier Forest (Pierre Elliott Trudeau Foundation), Stephen Tomblin (Memorial University), Jeff Braun Jackson (Ontario Professional Firefighters Association, Burlington, ON), Marie-Pascale Pomey (Université de Montréal), John N. Lavis (McMaster University), Harvey Lazar (Queen's University), Elisabeth Martin (Université

Laval), Tom McIntosh (University of Regina), Dianna Pasic (McMaster University), Neale Smith (University of British Columbia), and Michael G. Wilson (McMaster University).
