PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. Read this book and you'll not only understand WHY e-Business is vital to the continuing success of your organization but also HOW you can incorporate it into your business. Four key questions are asked within Making the e-Business Transformation: - How do you transform your existing business into an e-business? How do you go about introducing e-business into your Company? - What are the key enabling technologies? - What tools are needed to effectively manage domain and process knowledge? e-Business and e-Commerce is a revolution driven by IT. While computers and computer networks have been around for the last 50 years, it is only in the last five that they have found their way into everyday life. This book shows you how to harness the power of the new technologies to transform your business into an e-business company which will succeed in the e-commerce economy. For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network. IBM's® Practical, Hands-On Guide to Supporting and Administering Lotus Notes and Lotus Domino This is the only book that focuses entirely on the specific technical, desk-side, and infrastructure issues that support

professionals and administrators encounter when implementing and running Lotus Notes in production environments. Authored by one of IBM's top Lotus experts, it draws on the firsthand experiences of IBM professionals working in hundreds of client environments. Mark Elliott has created a true "encyclopedia" of proven resolutions to common problems and has streamlined processes for infrastructure support. Elliott systematically addresses support solutions for all recent Lotus Notes and Domino environments. *Survival Guide for Lotus Notes and Domino Administrators* is organized for rapid access to specific solutions in three key areas: client setup, technical support, and client software management. It brings together best practices for planning deployments, managing upgrades, addressing issues with mail and calendars, configuring settings based on corporate policies, and optimizing the entire support delivery process. Along the way, Elliott illuminates the administrative and support implications of the latest enhancements to Lotus Notes and Lotus Domino, in areas ranging from messaging to plug-in support. Whatever your role in managing, administering, or supporting IBM Lotus technologies, this book will help you respond more quickly, efficiently, and effectively—reducing support costs as you increase customer satisfaction. Coverage includes

- An overview to key software changes introduced in Release 8.0
- Resolutions to dozens of error messages and other obscure issues
- Using the "Smart Upgrade" toolkit to automate upgrades
- Implementing policies to manage client settings and reduce administrative overhead
- Optimizing Lotus Notes performance and avoid user frustration
- Making the most of technical support tools and plug-ins
- Finding technical support and patches on the IBM developerWorks website
- Configuring Lotus Notes and supporting common activities
- Usability testing and user experience research typically take place in a controlled lab with small groups. While this type of testing is essential to user experience design, more companies are also looking to test large sample sizes to be able compare data according to specific user populations and see how their experiences differ across user groups. But few usability professionals have experience in setting up these studies, analyzing the data, and presenting it in effective ways. Online usability testing offers the solution by allowing testers to elicit feedback simultaneously from 1,000s of users. Beyond the Usability Lab offers tried and tested methodologies for conducting online usability studies. It gives practitioners the guidance they need to collect a wealth of data through cost-effective, efficient, and reliable practices. The reader will develop a solid understanding of the capabilities of online usability testing, when it's appropriate to use and not use, and will learn about the various types of online usability testing techniques.

\*The first guide for conducting large-scale user experience research using the internet

- \*Presents how-to conduct online tests with 1000s of participants – from start to finish
- \*Outlines essential tips for online studies to ensure cost-efficient and reliable results

The IBM Lotus Sametime 8.5.2 Administration Guide uses a practical, no-nonsense approach to give you the essential information you need. Using realistic scenarios, you learn how to configure and maintain your environment to meet your needs and take advantage of the flexibility offered in Sametime 8.5.2. If you are responsible for installing and administering Sametime 8.5.2, then this book is for you. If you're completely new to Sametime administration, this book will serve as your roadmap. If you're making the jump from a prior version of Sametime, then you'll see how Sametime 8.5.2 differs and how you work with the new configuration. Even if you already have Sametime 8.5.2 up and running, this guide will answer those questions you may still have of why and how the various server components work. Many companies have a complex process for purchasing software that is required by IT projects, or better, by the business. Usually software is purchased by a centralized procurement function, and is either purchased on a project-by-project basis or as a large periodic software contract. Unfortunately purchasing software products does not automatically mean that these products are

exploited throughout the organization providing the maximum possible value to the business units. Several issues call for a structured approach that gets the most business value out of software already purchased. The objectives of this approach are to: Create maximum awareness throughout the organization of the software purchased. Track software use in IT projects and act if products are not used at all, used improperly, or insufficiently used. Facilitate use of software products in projects, especially when software products are complex and require a lot of integration. We can summarize the overall objective of this approach as ensuring that the business units in an organization obtain the maximum possible value of software products purchased, which is also the scope of this IBM® Redbooks® publication. Annotation IBM Workplace represents an entire portfolio of IBM products, new and existing, that focuses on increasing people's productivity in a new way. In this book, IBM Software Live! Program Director Douglas Spencer and Senior Lotus Consultant Ron Sebastian start with an introduction to people productivity in the context of IBM's On Demand Business vision. Then the IBM Workplace strategy and products are described. You will see how the underlying componentized software infrastructure of IBM Workplace provides the flexibility businesses need in the emerging on demand world. You will see how many users without traditional desks such as an outbound sales force, factory floor staff, airline pilots, etc. can collaborate with others boosting the productivity of the entire organization, trading partners, and customers. The authors then provide an overview of the key product lines that implement the IBM Workplace vision including IBM Workplace, WebSphere Portal, Lotus Notes and Domino, and WebSphere Everyplace. You will learn how the new IBM Workplace client technology for these products combines the rich user experience of client/server with the cost characteristics of Web-based applications, giving users the best of both worlds. In the final chapter, the authors explore industry-specific people productivity solutions tailored for the needs of specific industries including aerospace, defense, automotive, banking, financial markets, consumer products, electronics, utilities, government, health care, insurance, life sciences, retail, and telecommunications, etc. The Foreword, by IBM Software Group General Manager of Workplace, Portal, and Collaboration Software, Michael D. Rhodin, provides an insider's perspective on the thinking behind IBM Workplace. To help you stay current, this book comes with your personal password for accessing the companion Web site which offers up-to-the-minute IBM Workplace news, More on the Web links, and additional resources.

In recent years the management of business processes has emerged as one of the major developments to ease the understanding of, communication about, and evolution of process-oriented information systems in a variety of application domains. Based on explicit representations of business processes, process stakeholders can communicate about process structure, content, and possible improvements. Formal analysis, verification and simulation techniques have the potential to show deficits and to effectively lead to better and more flexible processes. Process mining facilitates the discovery of process specifications from process logs that are readily available in many organizations. This volume of Springer's Lecture Notes in Computer Science contains the papers presented at the 2nd International Conference on Business Process Management (BPM 2004) which took place in Potsdam, Germany, in June 2004. From more than 70 submissions BPM 2004 received, 19 high-quality research papers were selected. BPM 2004 is part of a conference series that provides a forum for researchers

and practitioners in all aspects of business process management. In June 2003, the 1st International Conference on Business Process Management took place in Eindhoven, The Netherlands. Its proceedings were published as Volume 2678 of Lecture Notes in Computer Science by Springer-Verlag. A previous volume (LNCS1806) on Business Process Management was based on four events devoted to this topic. This book constitutes the refereed proceedings of the Third International Conference on Cooperative Design, Visualization, and Engineering, CDVE 2006, held in Mallorca, Spain in September 2006. The book presents 40 revised full papers, carefully reviewed and selected from numerous submissions. The papers cover all current issues in cooperative design, visualization, and engineering, ranging from theoretical and methodological topics to various systems and frameworks to applications in a variety of fields.
