Moving Beyond Boundaries in Disability Studies Apr 29 2021  
What challenges are posed by changing transnational trends, agendas and movements that affect disabled people's lives, and what can disabled people, their representative organisations and their governments do to advance the agenda for self-determination and inclusion? This book draws together the writing of academics and activists to depict the experience and perspective of disabled people in relation to a range of contemporary social changes, with a focus firmly on ways in which disabled people and their allies can act to counter disabling policies and practices. Throughout the book there is an emphasis on disabled people's own voices and activism as the critical driver of theoretical critique and practical change. Chapters address a wide range of cultural, institutional and personal arenas to explore and contest the boundaries that disabled people seek to move beyond, from cross-border labour movements in Korea to experience of day services in England, from continuing and long-lasting realities of wars in Lebanon, Cambodia and Somalia to the beauty of harmony in Navajo traditions for understanding disability, from collective activism to individual participation in the Olympics. This book is recommended reading for students, researchers and activists interested in Disability Studies and is directly relevant to policy makers and practitioners in a position to reshape rights, spaces and innovations in response to the priorities disabled people feel and articulate are important for their lives. It was originally published as a special issue of Disability & Society.

Moving Beyond the Crisis : Reclaiming and Reaffirming our Common Administrative Space Mar 17 2020  
With the financial meltdown and the economic crisis in their fifth year already no

one can any longer be in doubt about their exceptional gravity, their truly global impact and their profound effects hurting vulnerable groups and the very poor especially. As the world looks for an exit from this economic crisis – the worst in eight decades – the focus of attention is naturally on the causes, the factors that account for its wide reach and severity, as well as on strategies that might bring it to a closure. The quest for exit strategies is at the very centre of the issues and concerns explored in the present volume, produced by the IIAS. Like the preceding volumes, but even more emphatically, this volume, representing a collective endeavour of scholars and practitioners from many parts of the globe, finds cause to lay the blame, for our difficult predicament, on the institutional deficit, the policies, the practices and values that have followed in the trail of a highly misleading and erroneous model of governance. The « Market Model of Governance » as it is known, sought to reform, the structures and culture of administration and government in private sector ways. While instrumental values like efficiency and effectiveness were raised and praised profusely, those of democratic governance were discounted by comparison. In particular, integrity, the rule of law and due process, equity, legality and public service professionalism suffered a steep decline, in several parts of the world. Likewise, the invasion and the capture of public space, inevitably led to an unprecedented surge of greed, abuse and corruption that contributed directly to the crisis which is upon us. Looking for exit strategies, as its title aptly suggests, the present volume offers a rich menu of ideas drawn from the current experience of all the world's main regions. Not surprisingly, two concepts stand out throughout the book as

necessary correctives, as well as pressing remedies to the world's ongoing malaise. They call for the recapture of our common administrative space and the reaffirmation of the values and virtues appropriate for democratic governance. To the IIAS, none perhaps are more important than public service professionalism and none other can contribute more effectively to the reform and consolidation of sound institutions for national, sub national, global and regional governance. For these reasons, at this juncture, the new volume like the others should be featured in every public library and become a vademecum of all scholars and practitioners of public administration and politics around the world.

Echoes of the Soul Dec 26 2020 One Palm Sunday, Echo Bodine prayed to be granted a better understanding of worlds beyond this one, and three days later she found herself on an amazing voyage. Leaving her body behind, she traveled through life, death, and then beyond in a breath-taking vision of what awaits us all after this life. Echoes of the Soul is heartwarming and enlightening. In simple prose, Echo Bodine gently leads readers through realms of existence we all have yet to experience. Her inspiring images leave us with a hopeful vision of life after death — or, as Echo calls it, graduation, when we go to our real home. This inspiring and positive vision of the afterlife leaves the reader filled with hope, and even awe. [Moving Beyond Individualism in Pastoral Care and Counseling](#)

Jul 01 2021 Despite astute critiques and available resources for alternative modes of thinking and practicing, individualism continues to be a dominating and constraining ideology in the field of pastoral psychotherapy and counseling. Philip Rieff was one of the first to highlight the negative implications of individualism in psychotherapeutic theories and practices. As heirs and often enthusiasts of the Freudian tradition of which Rieff and others are critical, pastoral theologians have felt the sting of his charge, and yet the empirical research that McClure presents shows that pastoral-counseling practitioners resist change. Their attempts to overcome an individualistic perspective have been limited and ineffective because individualism is embedded in the field's dominant theological and theoretical resources, practices, and organizational arrangements. Only a radical reappraisal of these will make possible pastoral counseling practices in a post-individualistic mode. McClure proposes several critical transformations: broadening and deepening the operative theologies used to guide the healing practice, expanding the role of the pastoral counselor, reimagining the operative anthropology, reclaiming sin and judgment, nuancing the particular against the individual, rethinking the ideal outcome of the practices, and reimagining the organizational structures that support the practices. Only this level of revisioning will enable this ministry of the church to move beyond its individualistic limitations and offer healing in more complex, effective, and socially adequate ways.

Why Woo-Woo Works Jan 15 2020 Why should we meditate? How can crystals heal the mind and body? Why is visualization so powerful - and so effective? Alternative therapies, healing

modalities, and spiritual practices are often referred to as 'woo-woo,' - but many of these approaches are actually supported by compelling scientific evidence. In this dynamic and thought-provoking book, David R. Hamilton PhD dives deeper into the true nature of consciousness and presents the cutting-edge research behind energy healing, crystals, meditation, and more. You'll discover:

- The science behind some of today's most popular alternative practices
- How your thoughts, emotions, and beliefs have healing power
- The benefits of nature and a holistic approach to healing
- A fascinating link between consciousness and human connection
- The relationship between suppressed emotions and disease

The ideas behind some of these holistic therapies have been around for millennia - but now we have scientific evidence demonstrating how they can contribute to physical, emotional, and energetic healing too. It's time to embrace the truth: That woo-woo really does work.

Brainmakers: How Scientists Moving Beyond Computers Create Rival to Human Brain Feb 14 2020 A fascinating tour behind the scenes at laboratories around the world as top researchers race to create revolutionary "thinking machines" that may one day lead to a new form of intelligence. Join David Freedman as he takes you on a fascinating tour behind the scenes at laboratories around the world as top researchers race to create revolutionary "thinking machines" that may one day lead to a new form of intelligence. The subject of fantasy and skepticism for centuries—from William James's mechanical bride to 2001's Hal to Star Wars' R2D2—artificial intelligence has been limited to number-crunching computers that are "smart" only in highly specific domains like chess—until now. *Brainmakers* is an eye-opening, mind-expanding, and mind-blowing journey through laboratories engaged in cutting-edge research into neuroscience and robotics. Inside, you'll discover: MIT's Attila, a 3.6-pound, six-legged robot that learns as it interacts with its surroundings. Japan's efforts to grow brain cells on chips and construct a "wiring diagram" of the human brain. UCLA's "robot farm," where robots will be "bred" for intelligence. In exciting yet accessible detail, Freedman shows how this research has moved into a new realm that transcends computer science, combining neuroscience, microbiology, evolutionary biology, and zoology. Modeled after natural rather than artificial intelligence, thinking machines may soon develop powers that rival—or exceed—those of the human brain.

The authors offer detailed analyses of current debates over integrating women into combat roles and the proper approach to confronting sexual harassment with the ranks. Each chapter includes concrete recommendations as to how the services should confront and manage these serious personnel problems. A survey of ROTC cadets provides additional data on the attitudes of future leaders. The book also identifies important ways in which female personnel can enhance effectiveness as the military adjusts to its changing role in the twenty-first century, particularly in peacekeeping operations.

Moving Beyond Belief Jan 07 2022 This book argues that a religion centered around biblical belief has not worked when it comes to living the teachings of Jesus. For many Christians

their religion has become an ideology which doesn't touch their hearts. The central argument of the book is that we must shift the focus of our religion away from biblical belief to a sense of the deep, transforming love that comes from knowing God. The book provides detailed instructions on how such a knowing takes place. In making such a change, Christians will finally come to a place where they can work with God to make the world a better place.

Moving Beyond Environmental Compliance Oct 04 2021 Since the U.S. Department of Energy (as well as other Federal and

International agencies) will stop granting contracts to companies that fail to comply with 14000 standards, the search is on for any book that will make 14000 compliance easier. Tom Welch, with more than 20 years experience in environmental engineering and project management, provides such a book! *Moving Beyond Environmental Compliance: A Handbook for Integrating Pollution Prevention with ISO 14000* is the first text to combine the best aspects of Pollution Prevention (P2), Total Quality Management (TQM), and ISO 14000, into a comprehensive "how-to" guidebook for achieving environmental compliance. The ever-increasing cost of environmental compliance as it is passed onto consumers, cuts into the profit margin and reduces an organization's competitive edge. At the very least, compliance cuts into operating budgets, and directs attention away from the primary business of an organization. This handbook demystifies the implementation of effective environmental management systems as described in the ISO 14000, and clarifies the application of effective pollution prevention methodologies that can drastically reduce this compliance burden.

[Moving Beyond Words](#) Apr 10 2022 Essays from the New York Times – bestselling author who inspired the film *The Glorias*, a “woman who has told the truth about her life and ours” (Los Angeles Times). With cool humor and rich intellect, Gloria Steinem strips bare our social constructions of gender and race, explaining just how limiting these invented cultural identities can be. In the first of six sections, Steinem imagines how our understanding of human psychology would be different in a witty reversal: What if Freud had been a woman who inflicted biological inferiority on men (think “womb envy”)? In other essays, she presents positive examples of people who turn gendered stereotypes on their heads, from a female bodybuilder to Mahatma Gandhi, whose followers absorbed his wisdom that change starts at the bottom. And in some of the

most moving pieces, Steinem reveals some of her own complicated history as a writer, woman, and citizen of the world. This ebook features an illustrated biography of Gloria Steinem including rare images from the author's personal collection.

Legal academics and progressive politics in South Africa: Moving beyond the ivory tower - PULP FICTIONS No.2 May 11 2022 Legal academics and progressive politics in South Africa: Moving beyond the ivory tower - PULP FICTIONS No.2 Edited by Karin van Marle 2006 ISSN: 1992-5174 Pages:30 Print version: Available Electronic version: Free PDF available About PULP FICTIONS - A space for dialogue: Central to the becoming of a society in the context of posts (postapartheid, postcolonial, postmodern) and in the context of transformations of the political, legal, socio-economic and cultural is the creation of a vibrant and active public sphere. Of particular concern is an insistence on democracy and transparency radically different from strategic and instrumental conceptions – a space for dialogue and dissent, an opportunity for creativity, experimentation and re-imaginings. About the publication In the second edition of PULP FICTIONS we continue the search for a vibrant and active public sphere through debate. As in the first edition, the dialogue is one between two academics from the faculty of law and, as in the first edition, different conceptions of law, politics and the role of the academic are teased out. The context of the debate in this edition is a series of research meetings of the Department of Legal History, Comparative Law and Jurisprudence at the UP Law Faculty. Over a course of a few of these meetings different perspectives on law, politics and the limits/ potential of the law were voiced

by different colleagues. Tshepo Madlingozi presented in one of the meetings his views on the role of legal academics in progressive politics. In this contribution, which appears here, he urges all of us to move 'beyond the ivory tower', get out of our 'air conditioned offices' and embrace participatory action research. Madlingozi defines the latter as field research where the researcher interacts and participates with communities and engages in research that is 'unashamedly' political. Anton Kok in response takes what he calls a 'pragmatic instrumentalist' view in contrast to Madlingozi's more 'ambitious critique'. Focusing more on law's potential he highlights the areas where law could contribute to transformation. Both colleagues are not afraid to put their personal political/ideological views on the table. In this way they contribute to the vision of creating a space for dialogue, dissent, creativity and re-imaginings. About the authors: Mr Tshepo Madlingozi works at the Department of Legal History, Comparative Law and Jurisprudence, Faculty of Law, University of Pretoria. Cannabis Policy Jul 21 2020 It looks at the experience of a number of countries which have tried reforming their regimes and softening prohibition, exploring the kinds of changes or penalties for use for possession: including depenalization, decriminalization, medical control, and different types of legalization. It evaluates such changes and draws on them to assess the effects on levels and patterns of use, on the market, and on adverse consequences of prohibition. For policymakers willing to look outside the box of the global prohibition regime, the book examines the options and possibilities for a country or group of countries to bring about change in, or opt out of, the global control system. Throughout, the book examines cannabis within a global frame, and provides in accessible form information which anyone considering reform will need in order to make decisions on cannabis policy (much of which is new or has not been readily available).

Moving beyond Islamist Extremism Oct 24 2020 Traditionally, far-right terrorism has been the black swan of terrorism studies—receiving less attention than Jihadi extremism. In this book, William Allchorn takes a deep dive into multiple

geographical locales and the online space of far-right movements, uncovering the crisis narratives that are animating violent far-right extremist milieus and presenting solutions on what we can do to stop them. Using eight country case studies and the results of an online pilot project, this is the first book-length presentation and discussion of counter techniques to far-right narratives—exploring their effectiveness, the ethics of such techniques, and their ability to disrupt pathways from radicalism towards violent extremism. Coming at a time of a renewed global wave of far-right violence, this book is of use to scholars as well as practitioners in the fields of far-right studies, terrorism studies, and strategic communications.

Moving Beyond New Testament Theology? Sep 03 2021

Moving Beyond Sunday Nov 05 2021 In every Christian there lies a powerful Spirit. It is up to you—the believer—to enable the Spirit of God to move in the way God desires Him to move. For God did not give us the Spirit of timidity, but of power, love, and self-control (2 Tim.1:7). Do you want to seek God's guidance? Do you yearn to remove the character defects in your life but have never been able to? How do you know if you need to grow up? Check the list below, and ask yourself: I have kept secrets about some of my faults and have hidden them from others? Have I been avoiding Christian fellowship? Do I feel frustrated that I'm not closer to God? Do I continue to take steps backwards in my Christian walk? Why do some Christians have it together, but I don't seem to have any Godly fire in my life? Have I attempted to get stronger in my faith but keep coming up short? Can I continue to be just an average Christian? Am I not reading the Bible and failing to memorize Scripture? Am I not meditating, fasting, or consistently

witnessing? How many of these apply to you? Are you ready to explore the power of the Holy Spirit in your life through Jesus Christ? If you apply the principles in this book and allow God to use the fire of His Word to refine your impurities, you will become a fulfilled, excited, and humble believer in Christ Jesus. Let's move beyond Sunday together.

**Moving Beyond Trauma: The Roadmap to Healing from Your Past and Living with Ease and Vitality** Mar 09 2022 Have you noticed that no matter how much time you spend in talk therapy, you still feel anxious and triggered? That is because talk therapy can keep you stuck in a pattern of reliving your stories, rather than moving beyond them. But, most of all, it's because trauma doesn't just reside inside your mind--much more importantly, it locks itself in other parts of your body. When left unresolved, that trauma continues to live there, impacting your life, your relationships, your sense of safety, and your ability to experience joy in very real ways. In **Moving Beyond Trauma**, Ilene Smith will introduce you to Somatic Experiencing, a body-based therapy capable of healing the damage done to your nervous system by trauma. She breaks down the ways in which trauma impacts your nervous system and walks you through a program designed to process trauma in a non-threatening way. You will discover a healing lifestyle marked by a deeper connection with yourself, those around you, and with everything you do.

Moving Beyond Modern Portfolio Theory Nov 12 2019 Moving Beyond Modern Portfolio Theory: Investing That Matters tells the story of how Modern Portfolio Theory (MPT) revolutionized the investing world and the real economy, but is now showing its age. MPT has no mechanism to understand its impacts on the environmental, social and financial systems, nor any tools for investors to mitigate the havoc that systemic risks can wreck on their portfolios. It's time for MPT to evolve. The authors propose a new imperative to improve finance's ability to fulfil its twin main purposes: providing adequate returns to individuals and directing capital to where it is needed in the economy. They show how some of the largest investors in the world focus not on picking stocks, but on mitigating systemic risks, such as climate change and a lack of gender diversity, so as to improve the risk/return of the market as a whole, despite current theory saying that should be impossible. "Moving beyond MPT" recognizes the complex relations between investing and the systems on which capital markets rely, "Investing that matters" embraces MPT's focus on diversification and risk adjusted return, but understands them in the context of the real economy and the total return needs of investors.
