Due to the lack of success in climate change mitigation efforts, the importance of adaptation is becoming more and more apparent and is now one of the main imperatives of international research and action. However, research on adaptation is mostly not directly applicable to adaptation policy or practice, leaving a gap between scientific results and practical advice for decision makers and planners. This book seeks to address this problem and bridge the gap and should provide readers with practical and applicable information on climate change adaptation. Following an introduction, the book is organised into four main sections, each reflecting an essential component in the adaptation process. Climate change adaptation is an emerging subject area and has gained increased political and academic attention within the last decade. Whereas most books in the field focus on adaptation in developing countries, this volume provides an examination of predominantly European policy and offers inter-disciplinary insight into cutting edge knowledge and lessons learnt in a relatively new field of implementation. This manual includes a brief introduction to the Uniform Data System--an integrated reporting system used by all grantees of various primary care programs administered by the Bureau of Primary Health Care, a set of General Instructions for completing the UDS and detailed instructions for completing each table. "Rules and Procedures for Aviators, U.S. Department of Transportation, From Titles 14 and 49 of the Code of Federal Regulations"--Cover. This manual builds on a millennial heritage to apply strategy that has come down to us from ancient Asia. Because the recommendations provided by its author, Sun Tzu, do not lose validity despite being more than 2,500 years old. It is known that it inspired many historical figures such as Napoleon or Machiavelli, and even in the strategies of the Vietnam revolutionaries. But all these applications were in the context of the war. Instead, the adaptation I made focuses on change management for managers. Because this treatise provides wisdom, common sense recommendations. Because in my own experience of studying commercial engineering and even obtaining a MBA, I felt many times that I did not have the wisdom to apply an organizational change. I will give a concrete example of the adaptations that I will make in the next chapters. The art of war says "The best victory is to win without fighting", my adaptation to the theme of this manual being the following "The best organizational change is that it is achieved without demands, disassociations or a worsening of the organizational climate". Because when I speak of wisdom, I am actually speaking of common sense. The CGIAR Research Program (CRP) on Aquatic Agricultural Systems (AAS) led by WorldFish aims to lift millions of people out of poverty and promote positive, transformative change in aquatic agricultural development. The AAS program recognizes that gender and power inequalities between men and women, which are reinforced at all levels of society, are key factors perpetuating poverty. One of the AAS themes aims to engage men as an integral part of its gender-transformative approach to the questioning and fundamental altering of unequal power relations and structures. These goals require the creation of spaces for critical reflection and action focused on harmful masculinities and their effects on the lives of women, girls, and men themselves - in combination with other approaches. However, thematically relevant resources (i.e. those that provide a conceptual and programmatic approach to such reflection with men and boys) have been lacking. To help fill this gap, this manual was developed by Promundo, based on experiences training in AAS country "hubs" (i.e. geographic locations providing a focus for innovation, learning, and impact through innovation research) in 2014 and informed by other resources related to the engagement of men and boys. The Users Manual describes each of the programs in the Generalized Monitoring Facility (GMF), discusses input options required to run each program, and provides sample outputs generated by each program. The Generalized Monitoring Facility is delivered on a FILSYS SAVE tape. A description of the software is presented in section 2. Installation procedures for the GMF Monitor and guidance on how to run GMF can be found in section 5 of this manual. (Author).
